HOSTED BY TWIN LAKES RECOVERY & SUMMIT BHC

Presented by Dr. Merrill Norton Pharm.D, Ph., CMAC

The Dangers of Vaping

1.5 CE | APPROVED

August 20 · 11:30am - 1:00pm EST

ZOOM WEBINAR

Approved for GA & SC LPC, LMFT, & Social Workers

Overview

The specific chemical exposure(s) causing lung injuries associated with e-cigarette product use, or vaping, remains unknown at this time. No single product or substance has been linked to all lung injury cases. More information is needed to know whether one or more e-cigarette or vaping products, substances, or brand is responsible for the outbreak. This presentation will help clarify the dangers of vaping and explain the vaping lung illness and the major concerns as it relates to COVID-19.

Objectives

1. Explain the specific dangers of the use of e-cigarettes and other vaping mechanisms;
2. Identify the various e-cigarette products and the dangers each presents to an individual
3. Develop an understanding of popcorn lung and other medical conditions that are caused by vaping;
4. Familiarize themselves with current prevention and treatment resources to managing vaping in the community.
